

# INSTANT SAMETIME DISCLAIMERS

## Centrally-controlled Automatic Disclaimers for IBM Lotus Sametime

### Your Business Dilemma

Do you need a way to automatically alert your Sametime users to your internal usage policies, or remind them that their chats are being archived and are subject to search and discovery?

### Instant Solution: Instant Sametime Disclaimers

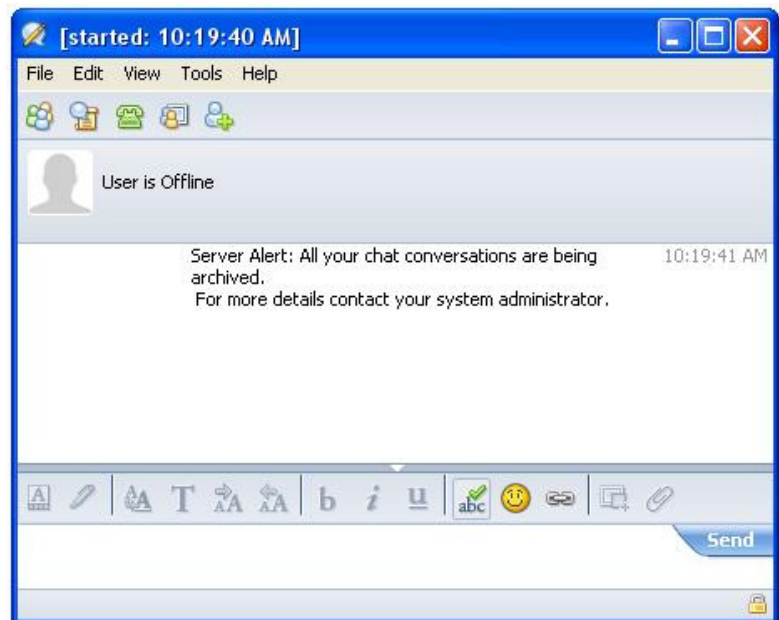

Instant Sametime Disclaimers is a Sametime server add-in task that monitors user log-ins and automatically delivers administrator-controlled disclaimer messages.

Disclaimers notify users that their Sametime chats are being monitored. Seeing such messages each time they log in reduces potential IM abuse and your legal risks related to IM abuse.

Instant Sametime Disclaimers can be deployed on its own, as a complement to your deployment of Instant IMtegrity Archives, or as an add-on to your existing Sametime archiving solution.

"Instant Sametime Disclaimers is an easy way to remind users that IM chats are business records and therefore IM should be used professionally and respectfully."

"We deployed Disclaimers in conjunction with Instant IMtegrity Archives. Our users are reminded regularly that the things they say in IM are centrally archived and subject to internal and external audits."

#### About Instant Technologies

#### About Instant Technologies

Instant Technologies specializes in developing social applications for the enterprise including products for IM compliance, IM administration, and help desk applications. Instant Technologies is a Lotus Advanced Business Partner and a Microsoft Certified Partner headquartered in Portsmouth, NH.
