INSTANT IMTEGRITY ARCHIVES
IM Archiving, Search, and Discovery for IBM Lotus Sametime

Your Business Dilemmas

You need to monitor and audit Sametime conversations for internal policy enforcement and/or external regulatory compliance
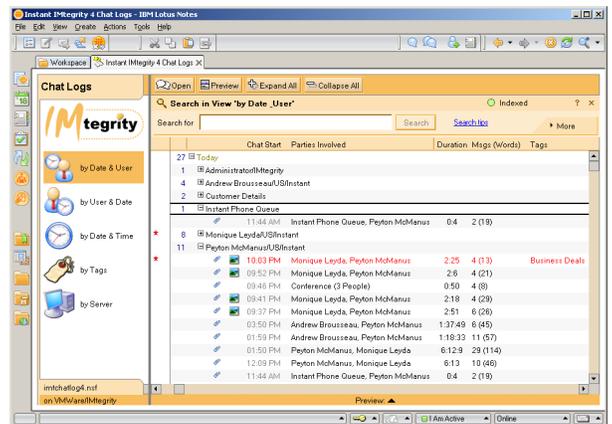

You need to convert the contents of your IM archives into a usable business asset

Your users need access to past conversations to do their jobs effectively

Instant Solution: IMtegrity Archives

Instant IMtegrity Archives for IBM Sametime provides IM archiving, full search and discovery for regulatory compliance, support for Sametime 8.5.x, real-time chat rules to enforce ethical firewalls, disclaimer text rules and overall performance improvements.   If questions are asked about who said what to whom, Instant IMtegrity Archives will provide irrefutable evidence.

IMtegrity Archives is highly scalable, and incredibly stable with only a 30 minute install

- Log and audit all Sametime conversations
    - Track who said what, what was discussed, when it was discussed, and how long the discussion lasted
    - Capture all images, emoticons, and screenshots in line with the chat text
- Admin console enables granular, archive-wide search and discovery
    - Enforce internal IM usage policies
    - Respond quickly and completely to audits and oversight committee discovery requests
    - Access is secured by Access Control Lists
    - Quickly create highly configurable, flexible, and powerful rules to precisely control which Lotus Sametime messages should be included or excluded from logging
    - Easily set automatic Action Rules to run predefined actions for chats that match specific selection criteria
- Archives are fully indexed and easily searchable
    - Quickly search by date or by person, or do advanced searches with Boolean operations, within time frames, or over a set conversation length
    - IM conversations—like email—become a usable digital asset
